

Report of meeting held at School of Economic Science, 11 Mandeville Place, London W1U 3AJ
See: **Notes of Open Research Group meeting on 17th Jan 2018: [OpenResearchGroup-180117](#)**

Present: Janos (chair), Steve, William, Mary (notes), Ashburn, Ellena

Apologies: Dagem, Ahmet, Bob, John Mc, Kyle Farren, Liliias, Paul, Philip, Sandra, Trevor,

Steve: presentation on Moderate Capitalism versus Inheritance Rights:

Due to recent pressures, Steve is delivering a reduced version of this presentation. His background includes education at an American Seminary for 5 years, and later at the University of London. He dedicated his life 27 years ago before he came to London, to find a solution to the world's economic problem. He diagnosed the world and came up with a solution. Steve's view is that the super-rich people are not industrious, they just count money. He has been studying this since 1994. He came up with a new understanding of a financial system for managing the world, where everybody owns something, but there is a limit of ownership. Capitalism was introduced by the monarchy, it began as feudal capitalism. This has not gone away. Its new face you cannot see. Faceless feudalism, the democratic society, is legitimized by consensus in parliament. Includes Corporate Feudalism. It was invented by a "few" individuals. The originally 40 families (feudal lords) has become 40,000 individuals – a new feudalism, including the Corporations.

Moderate Capitalism, uses new techniques. "Moderation" means something has to be controlled, and it must have a boundary. This is a new political economic infrastructure, and consists of the 99%. It's the only way to distribute wealth to the population. We have to be clever enough to produce something new. The original lords formed a system of regulation. The benefit of moderate capitalist society has an infrastructure, which enables it to continue to grow. They were not allowed to reform because they would lose control of their ill-gotten wealth. The corporate feudal lords are Faceless Capitalism. We can only reform it by using technology they will not understand. The feudal lords pass on their wealth through inheritance right, which is wrong. To counter this, we need to establish an institution, which limits inheritance rights. Hopefully, once certain things have been resolved, Steve will be back soon with a fuller presentation.

Ashburn also studied programming, and asked about deleting data. Steve agreed that once you've typed it, it cannot be deleted. The screen version is deleted, but it's still stored somewhere in your computer.

Ellena felt that something is speeding up and happening, and it cannot be ignored. On BBC2, the third part of The House of Saud, starting with the murder of the homosexual student, imprisoned here for 3 years, then prisoner exchange - mind-boggling! Available for a few more days on i-player:

<https://www.bbc.co.uk/iplayer/episodes/b09m53d9>

Ellena also told us about another programme about shipment of gold from Morocco, disguised as silver. See details here: <https://www.rt.com/news/416650-bribery-bullion-dubai-ernst-young/>

William responded that even the 9-11 Truth campaign, keeps out the no-plane theorists, when it's obvious if you look at the TV presentation that there were no planes, it was an explosion. He also very interested in studying the cycles of history, when you see the same situation, subject to the same forces, the same thing is going to happen. But if you have spiritual power you can change the repetition to make it what it should be.

For example, at the time of the Fire of London a revolution was brewing. When went to America, they were trying to decentralize power. This is what white people accomplished. After the fire the Jewish people arrived in London and set up the banking system. People don't want Deep State, they want to protect their own communities. Spartacus was trying to decentralize. 9-11 is a re-enactment of Jerusalem, both happened on consecrated land, with three walls, Titus was sent out to occupy Jerusalem. Bush was a continuation of his father, just like Titus was. Jesus was special.

"A day is a thousand years....the last days will be quickened." In the Parable of the Fig Tree, after three years it bore no fruit, and the farmer was going to cut it down but was persuaded to give it one more chance, and on the fourth year the fruit came: "The last days will be shortened." History is now in the fourth state, we have lived in the complete cycle since the year 2000. There are four stages: solid, liquid, gas, plasma. He is trying to find a way to present these ideas coherently.

Williams added that he bought a fan, the pull had a particular oval design, he left it behind and the man he bought it from sent it to him, which he appreciated, as someone who wanted to complete the cycle properly.

Steve says you don't know the world unless someone introduces it to you. In Egypt the black man was supreme but in another cycle the white man came into power.. People are brainwashed. As society becomes external people cannot relate to each other. How long as you are going to live on this earth. What if the Chinese take over the system

Janos added that Murray Bookchin says revolutions never go to the third stage, so people never achieve it. He is now working with the London Communalists to study these ideas – see notes on Matters in the Air, and the Events page on the Global Table website. **Contact via Meetup Page.**
